

**More Growth.
More Opportunity.
My Perspective.**

Material Flow Automation Expert (f/m/d)

Drive the planning, concept development, and continuous improvement of material flow automation at EGGER – and implement innovative intralogistics solutions across our international production network.

City: SJO Contract type: Full-time Job-Code: 6969 Department: Corporate Engineering

Your responsibilities

- **Drive automation concepts & projects:** You develop and implement innovative solutions for material flow automation (e.g., conveyor systems, automated warehouses, automatic guided vehicles, packaging lines, industrial robots) from concept to realization
- **Analyze requirements & design solutions:** You collect and structure project requirements, processes, and data, and translate them into technical specifications, concepts, and feasible solution proposals
- **Act as central expert & sparring partner:** You serve as the key contact for material flow automation within Corporate Engineering and act as a trusted sparring partner for local project managers
- **Coordinate stakeholders & planning phase:** You coordinate internal interfaces (e.g., Corporate Engineering, IT, competence centers, local technical teams) and external partners, ensuring smooth collaboration throughout the planning phase
- **Support implementation & optimization:** You support local project teams during implementation and continuously optimize existing automation systems across plants
- **Contribute to project evaluation:** You support project management with budget estimates, concept evaluations, and decision-making foundations

What we are looking for

- Technical education (e.g., automation technology, mechatronics, mechanical or electrical engineering, industrial engineering) or comparable qualification with relevant professional experience
- Several years of experience in automation, intralogistics, plant engineering, or a related technical field
- Strong analytical and problem-solving skills with the ability to translate complex processes into practical technical solutions
- Structured, solution-oriented working style with a high level of ownership, persistence, and strong communication skills
- Experience with CAD tools and a solid understanding of warehouse management, material flow, or manufacturing execution systems; project experience is an advantage
- Fluent English is required, German is an advantage, combined with a willingness to travel internationally (approx. 10–20%)

What we offer

Diverse tasks in a family-owned company with flat hierarchies and a warm working environment. Additionally, we value diversity and therefore welcome applications from all individuals. For this position, a yearly gross salary of € 72,000 is envisaged on a full-time basis, with the possibility of overpayment depending on your qualifications and professional experience.

Your Chances and Benefits

- Diverse Learning & Development Programs
- Health- & Fitness Programs
- Individual On-boarding & Targeted Induction
- Flexi-time without Core Hours & Home Office
- Staff Restaurant with Subsidised Meals
- Bikeleasing
